Dec. 2021

Ichinoseki Linear Collider Bulletin

English Translation

ILC on-site class at Ichinoseki Technical High School

On November 1st and 22nd, Ms. Satomi Fujisaki, an ILC extension member of the Morioka Regional Promotion Bureau and a technical specialist at Iwate University, gave an on-site lesson on the ILC at Ichinoseki Technical High School.

Assuming that high school students will take on the role of teachers and teach scientific lessons to elementary and junior high school students, students were advised to utilize visuals, quizzes, and diagrams to pique students' interest and keep them engaged. After the lecture, the students worked on making slides on the computer. Students will take on themes related to the ILC and teach

elementary and junior high school students.

ILCX2021 held

On October 26 to 29, the ILC International Development Team, which is working to establish the ILC Preparatory Laboratory, hosted an online ILC workshop (ILCx2021).

A communication session was held on the 28th, with panelists including researchers as well as local and international public relations personnel. Our city's Internationalization Coordinator, Aimi Bell, was a panelist. In addition to discussing the efforts to realize the ILC, suggestions for getting the ILC further known at home and abroad were discussed.

Space x ILC special exhibition

From November 27 to December 23, a special Space x ILC exhibition will be held at Higashiyama Library. This is in collaboration with Mizusawa National Astronomical Observatory, which celebrated its 120th anniversary, and the ILC, a facility to help unravel the mystery of the birth of the universe. During the exhibition, books and panels related to astronomy such as black holes and the ILC will be exhibited.
